

## Enhance Brand Interaction with Customers in Your Showrooms

### Provide the Best Showroom Experiences with Interactive Digital Displays

i3DiSPLaY Interactive Digital Display is the perfect choice to improve customer interactions at showrooms and galleries. i3DiSPLaY provides a list of available services in real-time with relevant content. The addition of interactive display screens allows you to empower customers, providing an alternative method to request and receive product-specific information.

Our display solutions for showrooms include:

- **Product Showcase**  
High-end digital display showcases are a brilliant method for sharing product specifications. i3DiSPLaY may also be configured to highlight products according to your requirements.
- **Interactive Live Activities**  
Go Live! Perform HTML creative content or games ('Spin-the-Wheel', 'Tikam-tikam', 'Lucky Draw') trend to interact more with your customers and to activate the interest in them of your brand.
- **Customer Data Collection**  
Capture your customers' data with a simple survey form through i3DiSPLaY panels, and generate data in useful formats afterwards.
- **Data Analytic**  
All touch statistics are stored for analysis. This feature allows you to analyze which content are being accessed the most and also identify the popular products and the behavioral patterns of terminal customers.
- **e-Catalogue Downloadable**  
Reduce printing costs by digitizing your showroom's brochures, agendas, or any other promotional materials.
- **Control Multiple Devices**  
You can change content on the fly from various showrooms from one place through our cloud servers.
- **Advertising**  
You can now broadcast bright, vibrant visuals of your products' popular items, limited time offers or promotions that can entice your targeted customers in your showroom.

### Time to Market

i3DiSPiLAY Cloud-connected platform allows you to create media regarding your company's products and services in a digital format, without any need for programming. With its interactive touch functions, potential customers are able to scroll through and navigate your digital catalog with ease. No more waiting!

### Beyond Slide Shows

i3DiSPiLAY goes beyond simple full HD pages displayed as a slide. Interactive design elements may be assigned to multiple areas on a page. You define what populates each spot on a page, and its interactive element. Full storyboards and exciting showcase can thus be created with ease!
